-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stroud(1416995) taken together with German reference(2811536).

Stroud teaches a cyclone dust separating apparatus comprising a first cyclone for separating dust from air, a plurality of minute dust particles from air by using a centrifugal force after the dust separation at the first cyclone, and a cover disposed on an upper portion of the first cyclone. Stroud is silent as to the cover disposed on an upper portion of the first and second cyclones, the cover including a guide formed at a lower center to guide discharged air from the first cyclone into the second cyclones. German reference teaches a plurality of cyclones (figure 1), a cover disposed on an upper portion of the plurality of cyclones, and a guide formed at a lower center to guide air into the plurality of cyclones. It would have been obvious to someone of ordinary skill in the art at the time of the invention to provide a cover disposed on an upper portion of the plurality of cyclones, and a guide formed at a lower center to guide air into the plurality of cyclones of Stroud in order to provide for a smooth airflow transition between the first cyclone and the second cyclones of Stroud.

Allowable Subject Matter

Claims 16 and 17 allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claim 16 recites a vacuum cleaner including a vacuum cleaner, body, bottom brush, and cyclone separating apparatus including a cover including a guide formed at a lower center. Stroud (1416995) teaches a cyclone separating apparatus, but does not teach limitations to a vacuum cleaner body and bottom brush. Claim 17 depends on claim 16 and hence is also allowed.
